THE UNIVERSITY MEDICINES

are not patent medicines, but the favorite prescriptions of the New York Medical University, an incorporated institution of the State, and are prepared in connonance with the views of a number of distinguished living American practitioners, who believe that the time is come when educated physicians should arise and make a decisive effort to overthrow the health destroying system of quackery prevailing in every town and city and substitute scientific, responsible repredies—made in accordance with the principles of medical chemistry—in place of the worthiess or dangerous patent medicines [gooding the country.

A knowledge of medicine and chemistry as profound as that of any physicians that have ever lived enables us to warrant these compounds to be the most perfect curatives for disease ever placed before thespoole. What may seem almost incredible is the astonishing rapidity with which they cure diseases hitherto considered incurable.

They are combined with great care from fine chemicals, with a true knowledge of their therapeutic properties and physiological effects. Nothing cheap, impure or poisonous has been tolerated in their composition.

They are the finest prescriptions of a body of eminent American professors, and have been thoroughly tested in one of the most extensive and successful practices of the day.

THE UNIVERSITY MEDICINES

are to-day sweeping the country from Maine to Mexico, becoming the healing Health Restoratives, and rapidly supersecting the old possons, nostrums and nauseous drug, and health estoratives, and rapidly supersectible by over one thousand physicians.
